

# Commissioning, Testing and Startup Of Electrical Systems Course

## Venue Information

---

**Venue:** London UK

**Place:**

**Start Date:** 2026-09-22

**End Date:** 2026-09-26

## Course Details

---

**Net Fee:** £4750.00

**Duration:** 1 Week

**Category ID:** EAPET

**Course Code:** EAPET-4

## Syllabus

---

### Introduction

The safe and efficient operation of modern electrical equipment and control systems requires the successful testing, start-up, and commissioning of this equipment or system to ensure correct operation, plus:

- Accurate troubleshooting
- Subsequent repair of this equipment or system
- Ensuring continued productivity

### Objectives

- A better understanding of commissioning procedures
- A better understanding of troubleshooting procedures

## **The Technology of Electrical Equipment**

- Transformers, Power supplies (UPS), Batteries
- Generators, Switchgear, Disconnect switches
- Neutral ground resistors (NGR)
- Motor control centers (MCC), Variable frequency/speed drives (VFD/VSD)
- Programmable logic controllers (PLC), Distributed control systems (DCS)
- Power monitoring
- Control relays/timers/switches, Motor/feeder protective devices
- Miscellaneous equipment: Heaters, solenoid valves, electric valve actuators, signalling/alarm devices

## **Commissioning and Testing of Electrical Equipment**

- Methods
- Principles
- Special techniques
- NEC checklists

## **Troubleshooting of Electrical Equipment**

- Methods, Terminology, Principles
- Special techniques
- Case studies/examples
- Single-line drawings
- Group exercises

## **The Use of Test Equipment**

- Digital voltmeter (DVM)
- Megger
- Frequency meter
- Temperature probes/pyrometers
- Ammeters, Power meters
- Load banks
- Digital hydrometers
- Cable fault locators

## **The Interpretation and Use of Drawings**

- P&IDs
- Logic and standard symbols

### **The Development of a Job Plan**

- Identification of the troubleshooting step-by-step sequence
- Procedure preparation
- Follow-up
- Safety considerations and training

### **The Identification and Repair of Problems/Failures**

- Common mode failures, Phase imbalance
- Electronic component failure, Fusing
- Motor windings/bearings/brushes
- Excitation circuits
- Battery cells, Inverters/rectifiers
- Bushings, Switches
- Control circuits
- Ground faults

### **A Review of Safety Requirements**

- Area classifications
- NEC electrical codes
- Safety information
