### Skilllinx's Office Facilities Management courses: Mastering Office Services

**Introduction:** In many organizations, office services management is often overlooked or relegated to a secondary priority, resulting in missed opportunities for efficiency and cost savings. Our highly sought-after courses offers comprehensive coverage of relevant topics within a single day, adaptable to the diverse needs of both FM professionals and those new to the field.

**Objectives:** Tailored to specific focus areas, this courses aims to equip participants with:

- Fundamental knowledge of building services
- Practical insights on space audits and relocation projects
- Strategies for identifying and capitalizing on cost-saving opportunities
- Guidelines for managing supplier contracts effectively
- Understanding and compliance with health and safety regulations
- Expert advice on engaging with equipment suppliers and other third parties

### **Day 1: Understanding the Building**

- Exploring building structures and utility services
- Introduction to heating, ventilation, and air conditioning systems
- Addressing energy conservation and environmental considerations
- Strategies for efficient maintenance planning

### **Day 2: Managing the Space**

- Defining functional requirements and understanding physical constraints
- Design principles for flexible office spaces
- Ergonomics and furniture selection for optimal workplace design
- Navigating space management plans and relocation projects
- Identifying cost-saving opportunities within space management

### **Day 3: Managing the Equipment**

- Assessing IT infrastructure needs: computers, cabling, printers, etc.
- Telephony systems management
- Maintenance of office equipment: photocopiers, fax machines, etc.
- Ensuring functionality of vending machines and kitchen equipment
- Best practices for supplier contract management and cost optimization

### **Day 4: Managing Health and Safety**

- Understanding legal requirements and conducting risk assessments
- Protocols for accident reporting and compliance with fire safety regulations
- Implementing effective security policies and emergency planning measures

### **Day 5: Managing Third-Party Relationships**

- Navigating landlord and managing agent relationships
- Selecting and managing suppliers for goods and services
- Coordinating with contractors and ensuring service quality
- Addressing the unique challenges of managing remote or homeworking environments
