Course Syllabus

Introduction

This course is designed to present the basics of project management with a focus on understanding project management terms, project selection, planning, estimating, scheduling, and earned value management. If you are new to projects or been assigned to projects and need to understand how to manage the project, this is the course for you. This course will also cover the highlights of quality, risk and procurement. You will leave this course with a full understanding of what project management is and how to manage a successful project.

This course will feature:

- Review & understanding of common project management practices.
- Hands on experience with the project charter, scope statement, & earned value management.
- Appraisal of projects using project selection techniques, project chartering & gathering requirements

By the end of this course, participants will be able to:

- Understand the fundamentals of project management – the ability to initiate, plan & execute basic controls for a project
- Understand the techniques of project planning and how to deliver one
- Understand how to define project success using key performance indicators & quality metrics
- Identifying risks and understanding the advantages of various types of contracts
- Understand how to control, manage and close a project to your customers satisfaction
