Syllabus

Course Syllabus

Introduction

This programme on Strategic Enterprise Analysis provides a practical framework to understand business strategy in order to identify business needs, problems and opportunities. The application of the framework results in the identification and definition of solutions to meet business needs and the justification of the investment necessary to deliver such solutions. In this programme you will learn how to work at the enterprise level to apply evaluation techniques to proposed projects. This methodical analysis provides information that is key to effective organizational planning and decision making. Participants will analyse a business initiative from inception through the project life cycle by applying the enterprise business analysis principles and other proven tools and methods.

objectives

- Understand the role of the enterprise analyst

- Analyse opportunities and threats
- Assess capability gaps
- Move an initiative from inception to project charter
- Identify strategic risks
- Analysing solution feasibility
- Prioritising and ranking high-impact initiatives
- Defining initial solution scope
- Developing the business case
